(54) Title: A SENSOR ASSEMBLY, A FLUID PUMP AND A COOLER

WO 2004/104419 A1

(57) Abstract: The present invention relates to a sensor assembly 1 for measuring movements of a fluid pump (10), the fluid pump (10) being driven by an electric motor (30) and the electric motor (30) being connectable to a feed voltage (V), the sensor assembly (1) comprising an accelerometer (2) and wherein the accelerometer (2) is electrically associated to a bias circuit (51), and wherein the latter comprises a feed terminal (34) and a signal terminal (33), the feed terminal (34) being electrically connectable to the feed voltage (V) of the motor (30), and the signal terminal (33) being electrically connectable to an external measuring terminal (55). A fluid pump (10) is also described, which comprises a cylinder (58), a piston (57), a housing (50) comprising a hermetic terminal (60) and hermetically enclosing the cylinder (58) and the piston (57), thus forming a hermetic assembly (100), the piston (57) being driven by an electric motor (30), the electric motor (30) being connected to an electric voltage (V) by means of a pair of voltage terminals (61, 62) associated to the hermetic terminal (60), the fluid pump (10) comprising a sensor assembly (1) associated to the cylinder (58), the sensor assembly (1) comprising a feed terminal (34) and a signal terminal (33), the feed terminal (34) being connected to one of the voltage terminals (61, 62) and the signal terminal (33) being electrically connected to an external measuring circuit (55).
